

**Kingsfield Lakes ARC
Play Structure Guidelines
(From March 2009)**

1. *A picture and/or plans of the structure need to be included with the request.*

It is difficult to approve something without having an idea of what the end result will look like.

2. *Wooden play structures can be natural wood or stained (stain sample would have to be included with request for approval).*

This will keep all structures consistent with community standards (with other play structures already standing). There are currently no painted structures (that we could find) in the community so natural wood or stain is standard and will be considered.

3. *Pictures of decorative fixtures desired must be attached to request for consideration.*

Currently the play structures in our community do not have decorative fixtures.

4. *If a canopy will be included in the structure, a color sample of the fabric should be included with the request.*

Currently primary colors have been approved.
